Technical Assistance Timeline

Today's Objectives

By the end of this webinar, you should be able to:

- Understand the intent of the Round 3 RFA, including the *Centers for Innovation and Impact*
- Provide examples of the RFA's key characteristics in practice
- Design accelerated ELL healthcare pathways
- Engage employers meaningfully across pathways
- Align partnerships, occupations, and outcomes to RFA expectations

DISCLAIMER

- Neither WestEd nor IRC were involved in the creation of this RFA, and they will not be involved in the scoring or selection of grantees.
- The purpose of this webinar is solely to provide more information about the RFA. Nothing shared in this webinar will guarantee approval or have any impact on whether a consortium's application will be awarded.

Why Round Three Looks Different...

- All 71 consortia eligible to apply
- Shift from individual programs to ***Centers of Innovation and Impact in Health Careers***
- Emphasis on:
 - Innovation
 - Acceleration
 - Workforce and labor-market alignment
 - Regional impact
 - Sustainability and scalability

What This Webinar Will (and Will Not) Cover

Will cover

- Center design expectations
- Employer engagement requirements
- Accelerated learning models
- Pathway and partnership design

Will *not* cover

- Budget line-item development
- Narrative formatting tips unrelated to design
- Data collection and reporting

Big Idea: From Isolated Programs to Workforce-Driven Centers

- Round 3 funds Centers, not isolated programs
- It is investing in regional Centers of Innovation and Impact that*:
 - Drive innovation in healthcare career pathways
 - Build specialization and expertise
 - Coordinate systems
 - Drive sustained workforce outcomes
 - Incorporate employer input at the strategic design level

Defining “Centers for Innovation and Impact”

A Center:

- Serves as a hub of innovation, specialization, and expertise
- May be a physical location, but is not required to be
- Is intentionally designed to:
 - Develop and implement innovative service models
 - Accelerate ELL entry into healthcare careers
 - Improve systems, not just services
 - Benefit partners beyond a single institution

A Center is *not*:

- A single class or short-term pilot
- Employer engagement limited to advisory roles / letters of support
- A program disconnected from hiring demand
- A set of disconnected activities without a pathway

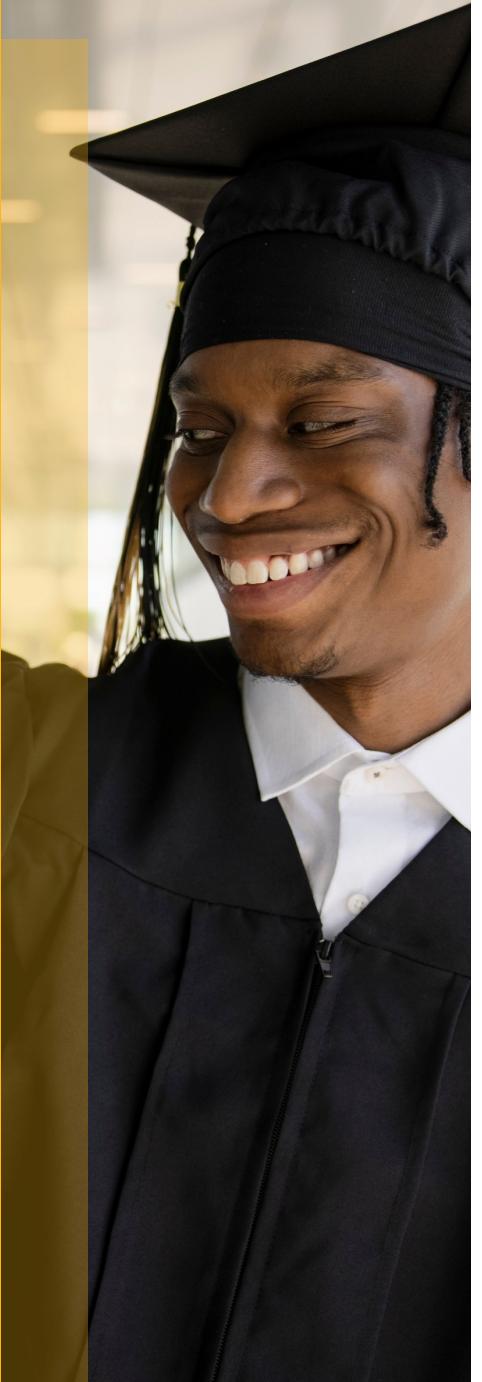

Priority Occupations*

1. Dental Assistant
2. EMT
3. Medical Assistant
4. Mental / Behavioral Health roles
5. CNA
6. Pharmacy Technician
7. Phlebotomy
8. Social / Human Services Assistant

Proposing Other Occupations*

- ✓ Living-wage outcomes
- ✓ Strong regional hiring demand

Key Characteristics of Centers

Centers funded under Round Three are expected to serve as:

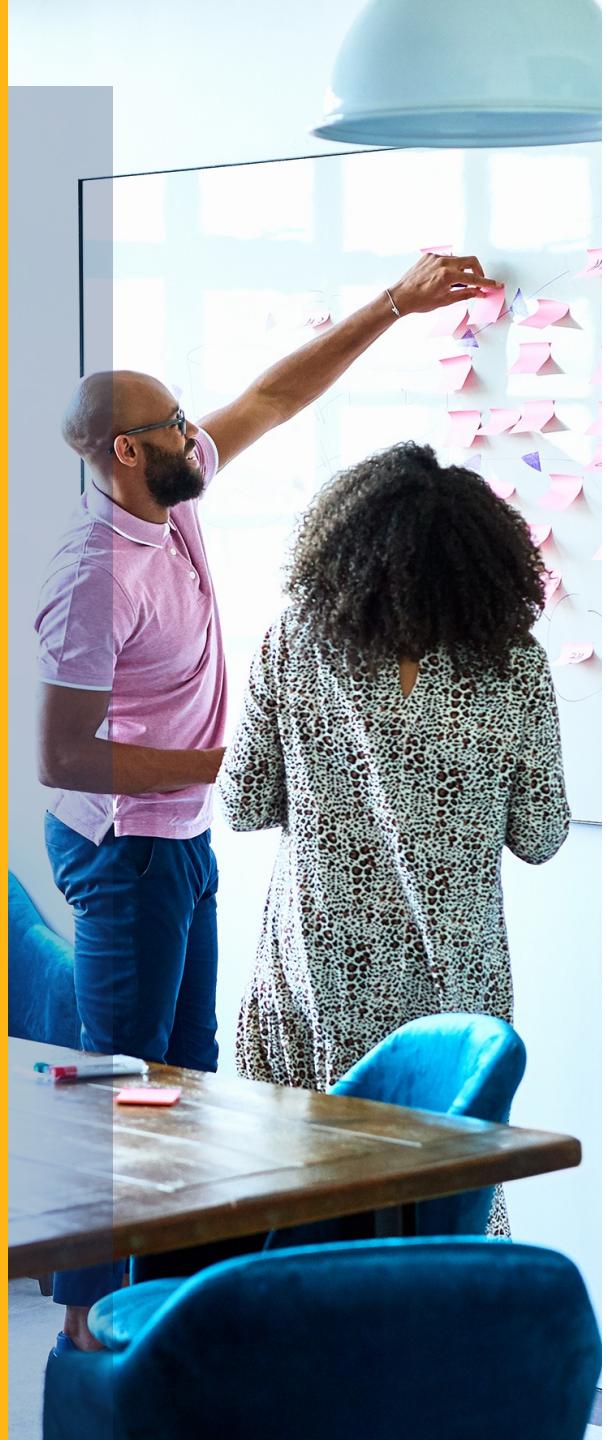

- Engines of excellence and expertise
- Drivers of innovation
- Coordinators of education and employer partnerships *on a consortium-wide, community-wide, and/or regional level*

These characteristics come directly from the RFA and are design expectations.

Key Characteristic 1: Hubs of Specialization and Expertise

- **Build evidence-informed expertise in:**
 - Priority healthcare occupations
 - Accelerated training strategies for ELLs
 - Workforce development models
- **Maintain current understanding of:**
 - Credentialing and licensing requirements
 - Employer skill needs
 - Effective andragogical practices for adult ELLs
- **Develop tools, frameworks, and curricula that are:**
 - Applied locally
 - Scalable statewide

What This Looks Like in Practice

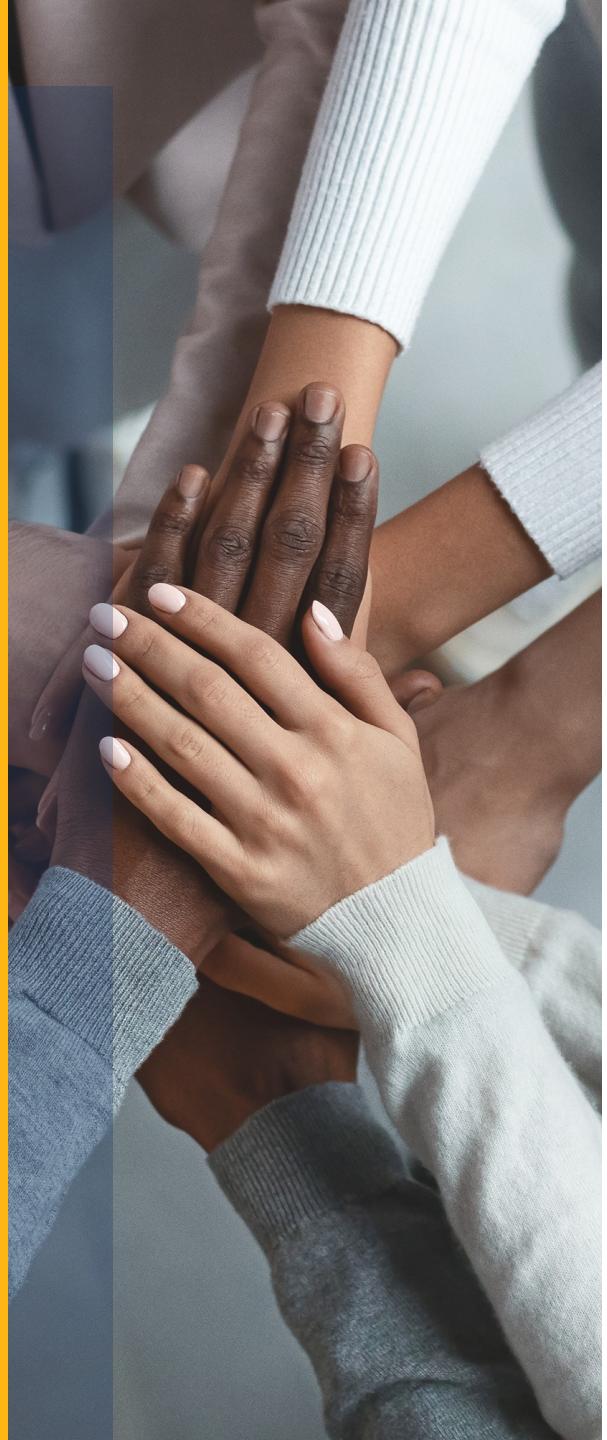

(Ideas, not requirements)

Examples include:

- A consortium develops standardized ELL-focused curricula for Medical Assistant and CNA pathways aligned to employer competencies.
- Faculty and staff regularly update curriculum based on licensure or industry changes.
- The Center serves as a curriculum repository across consortium members.
- Employers help define job-specific language and skill demands, which are embedded into instruction.

Key Characteristic 2: Strategic Pursuit of Goals and Outcomes

- Operate with a clear strategic plan for:
 - Sustainability
 - Scalability
 - Student retention
- Establish measurable outcomes tied to:
 - ELL enrollment
 - Credential attainment
 - Transitions to postsecondary education
 - Transitions to employment
- Align goals with:
 - Local and regional workforce demand
 - Consortium member priorities

What This Looks Like in Practice

- Shared targets for ELL enrollment, program and credential completion, transitions to credit programs, and job placement
- Outcome goals aligned to employer hiring demand
- Regular data reviews with consortium and employer partners
- Adjustments to pathway design based on performance data
- Early planning for sustainability beyond grant funding (i.e., braided funding, institutionalization, or employer-supported models)

Key Characteristic 3: Exemplifying Operational Excellence

- Demonstrate high-quality program design and implementation
- Use data-informed decision making
- Ensure strong fiscal and administrative stewardship
- Support effective cross-agency collaboration
- Provide professional development, technical assistance, and coaching

Giving California student success achievement

DataVista is the metrics platform for informed and Adult Education student success. DataVista provides a deeper understanding of student achievement, build outcomes and provide information to support schools, colleges and within the state.

Quicklinks:

[SELECT A REPORT TO VIEW](#)

Reports and Insights

View highlights and trends for a specific program.

This data view allows access to reports and supporting resources for specific statewide programs or initiatives.

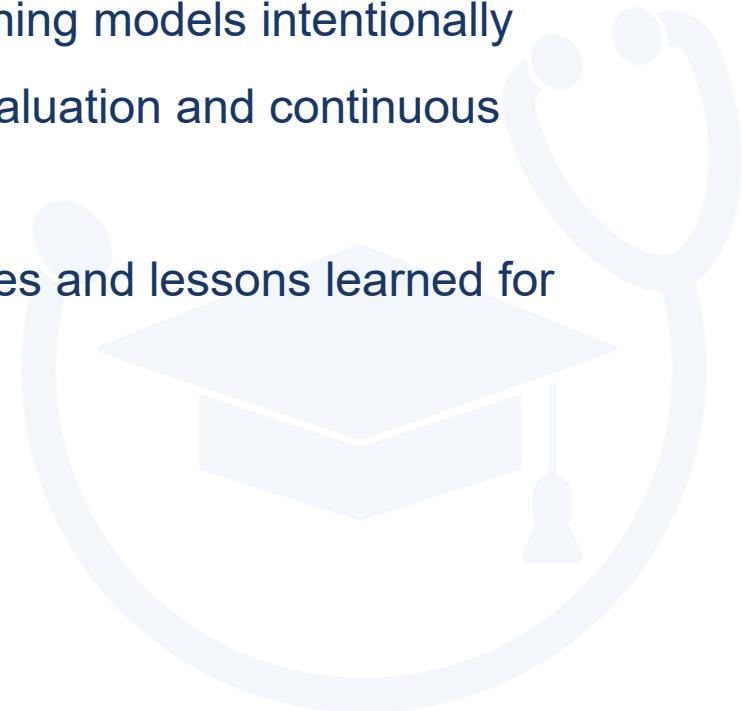

What This Looks Like in Practice

- Adult schools and colleges align intake, placement, and advising processes so learners experience a seamless transition
- Coordinated instructional schedules and sequencing across partners
- Employer-informed clinical and work-based learning logistics
- The Center offers professional development and coaching to instructors across member agencies.
- Data tools or dashboards are used to monitor progress and inform decision-making across partners.

Key Characteristic 4: Incubators of Innovation and Improvement

- Pilot new instructional and support models
- Leverage technology to support learning
- Experiment with co-teaching and team-based delivery
- Apply accelerated learning models intentionally
- Pair innovation with evaluation and continuous improvement
- Document best practices and lessons learned for sharing statewide

What This Looks Like in Practice

- The Center pilots co-teaching models that pair ESL and CTE instructors in healthcare courses.
- Technology is used to support hybrid instruction or simulated clinical experiences.
- New accelerated models (e.g., compressed bridge programs) are tested or refined.
- Learner and employer feedback loops
- The Center documents what worked, what didn't, and why, and adjusts program design accordingly.
- Dissemination of lessons learned across the state

Key Characteristic 5: Consortium and Community- Wide Impact

- Benefit students, communities, and partners
- Actively engage stakeholders, including employers
- Build capacity across institutions
- Foster a shared vision for pathway sustainability and expansion
- Document success in healthcare vocational pathway outcomes

What This Looks Like in Practice

- Multiple adult schools and colleges adopt shared pathway designs developed by the Center.
- Employers use the Center as a preferred talent pipeline.
- The consortium hosts regional convenings or communities of practice.
- Practices developed through the Center influence policy, programming, or regional strategies beyond the original partners.
- Leverage employers for paid work-based learning, clinical placements, equipment, or direct hiring commitments
- Add programs to the ETPL so participants can access other workforce funds to support training costs

Acceleration & Pathways

Accelerated Learning: What it Means

- Reduced time to credential
- Removal of unnecessary barriers
- Embedded language and occupational learning
- Early and continuous employer exposure

Accelerated Learning Models may include (but are not limited to):*

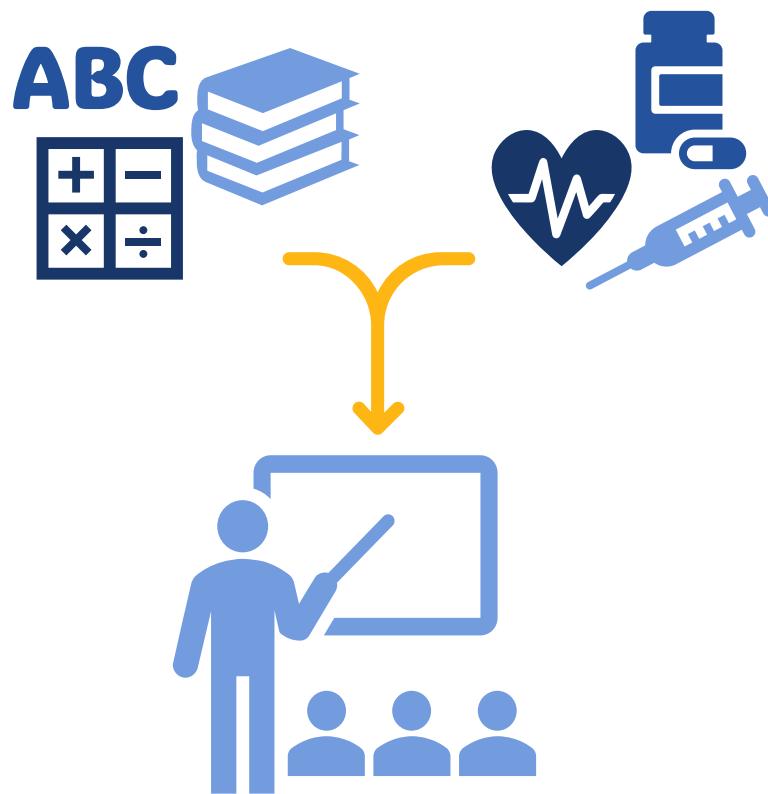

- Pre-apprenticeship
- Bridge programs
- Dual / concurrent enrollment
- Integrated Education and Training (IET)
- Work-based learning

Accelerated Learning Model: Pre-Apprenticeship

- Short-term, preparatory training aligned to healthcare roles
- Focus on foundational skills, workplace readiness, and language
- Designed to prepare learners for:
 - Apprenticeships
 - Entry-level employment
 - Further credentialed training
- Employer involvement in design and transition

Accelerated Learning Model: Bridge Programs*

- Contextualized instruction combining ESL and healthcare content
- Designed to move learners into CTE or credential programs
- Focus on:
 - Academic readiness
 - Career exploration
 - Occupational language
 - Foundational healthcare skills
- Time-limited and intentionally sequenced

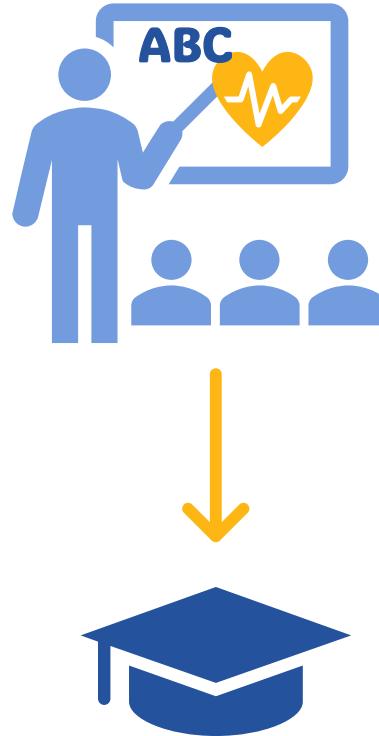

Accelerated Learning Model: Dual Enrollment / Concurrent Enrollment

- Simultaneous enrollment across:
 - Adult school and community college
 - ESL and CTE
- Reduces time between education levels
- Shared advising and instructional coordination
- Supports smoother learner transitions

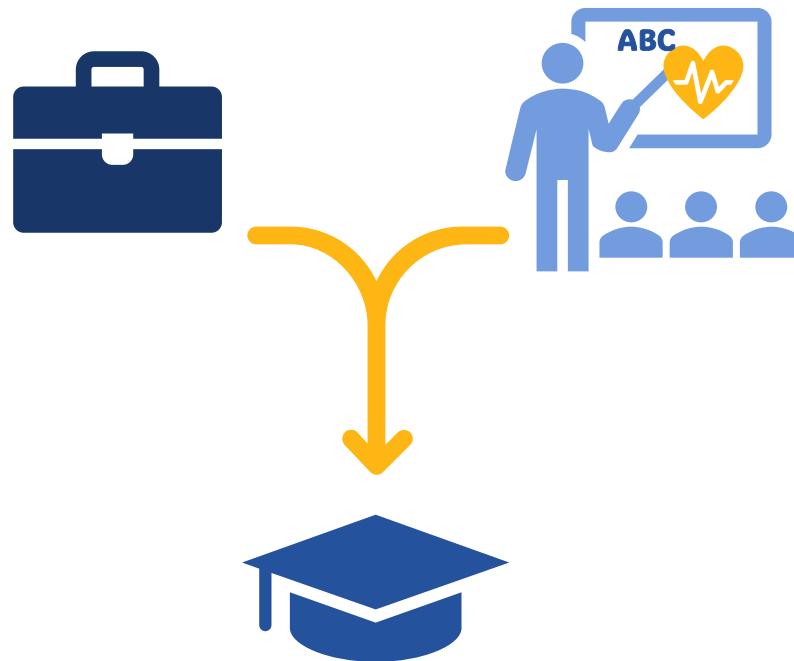

Accelerated Learning Model: Integrated Education and Training (IET)

- Concurrent delivery of:
 - ESL instruction
 - Occupational training
 - Workforce preparation
- Team-taught or closely coordinated
- Designed to accelerate credential attainment
- Strong alignment with employer needs

Accelerated Learning Model: Work-Based Learning*

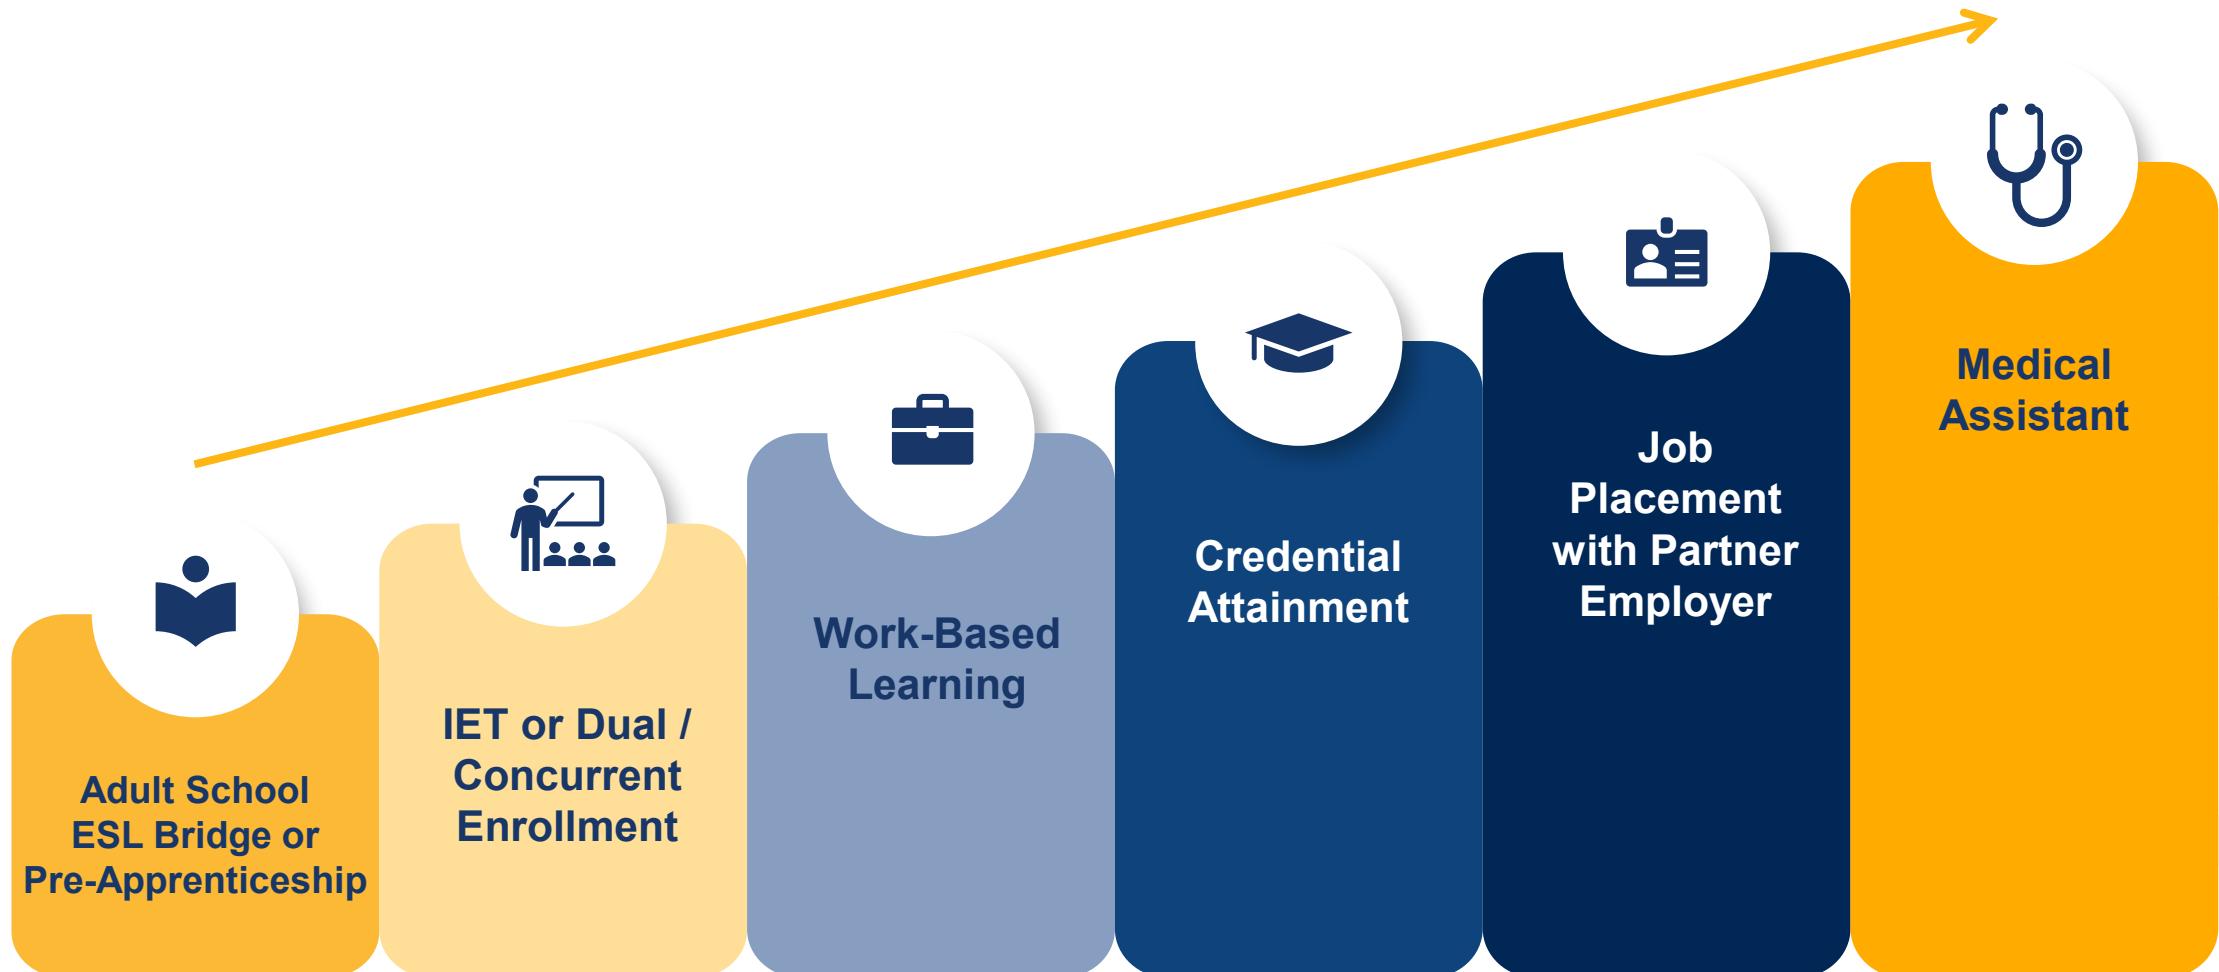

- Structured learning in real or simulated work settings
- May include:
 - Clinical placements
 - Paid or unpaid work experiences
 - Job shadowing or simulations
 - Internships/externships
 - Apprenticeship-aligned models
- Employer-hosted and competency-driven

Choosing the Best Model(s) for your Program

- Fit for ELL needs
- Alignment with employer demand
- Clear role within the pathway
- Direct connection to employment

Example Pathway with Employer Touchpoints

Employer Engagement

A Core Expectation

Meaningful Employer Engagement -

- Co-designing pathway and curriculum
- Hosting work-based learning
- Hiring or prioritizing graduates for job placement
- Extends beyond advisory roles

Documented Employer Partnerships -

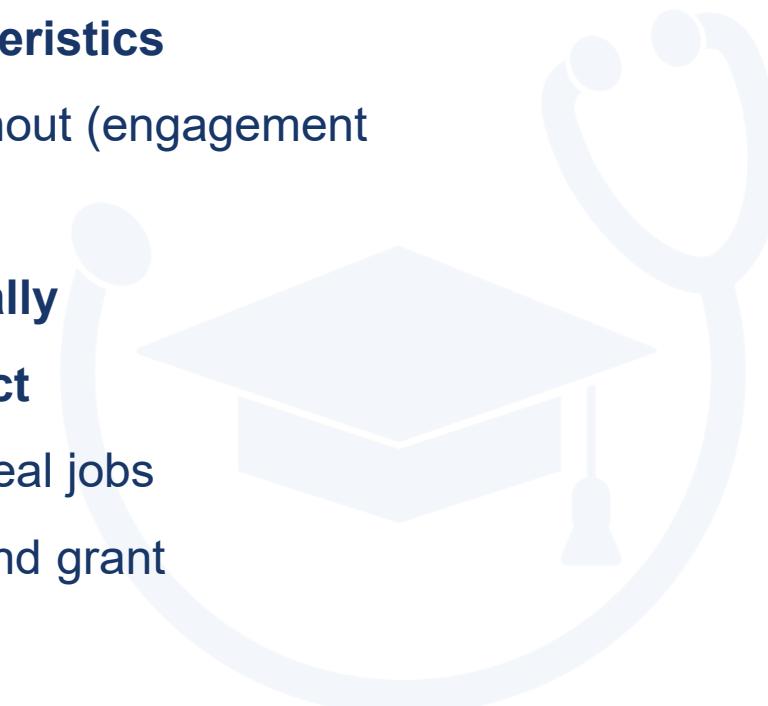

- Named healthcare employers
- Clear description of employer roles
- Evidence of sustained commitment

Employer engagement is required, not optional

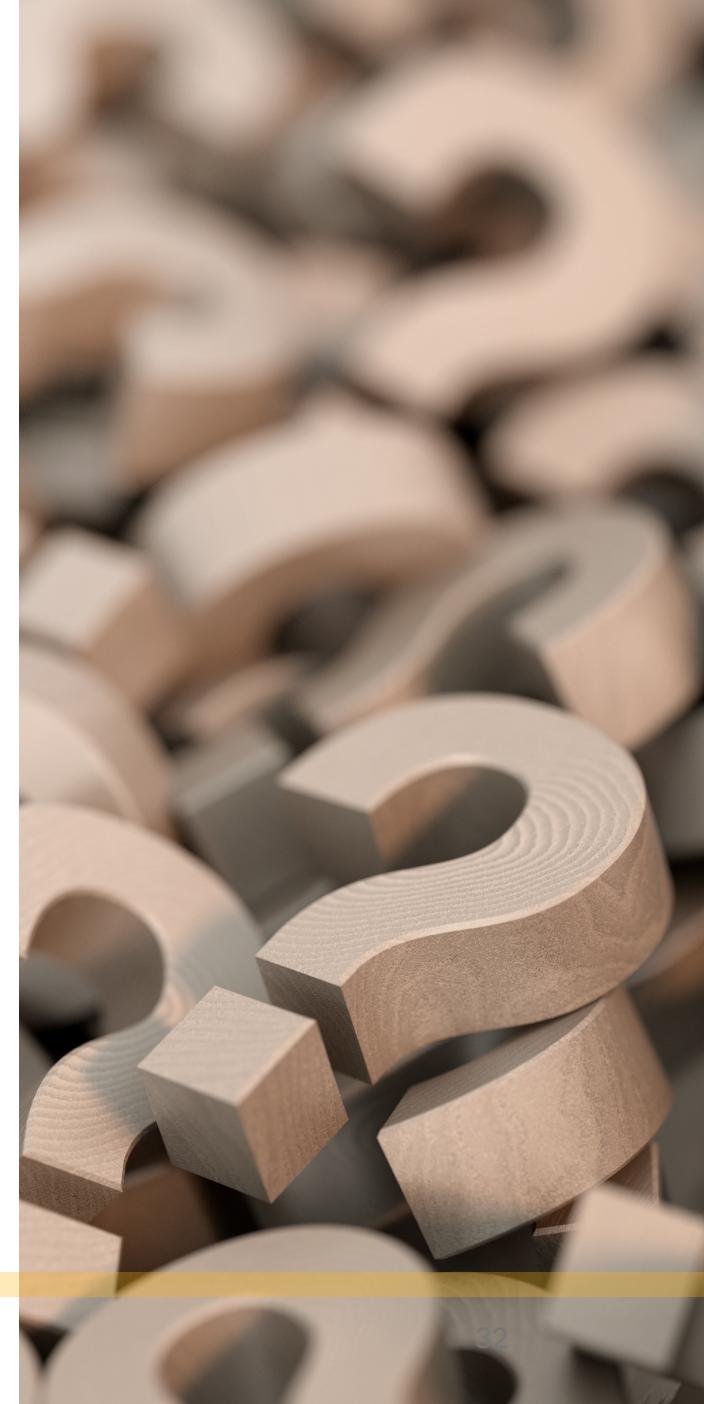

What Strong Proposals Do Well

- Clearly **define the Center**
- Address all **five key characteristics**
- Integrate **employers** throughout (engagement beyond advisory roles)
- Use **acceleration strategically**
- Demonstrate **regional impact**
- Show **pathways** leading to real jobs
- Plan for **sustainability** beyond grant

Questions & Discussion
